- *CLIL- It's awesome that Teacher Steven demonstrates how to carry it out in a wild classroom. By teaching an ancient Australia mythology, I can clarify the abstract concept.*
- *If the target is to help students learn about the culture around the world then the teacher may design a series of teaching activities related to this topic. I'm so glad I found and realized this teaching principle in Steven's class.*
- *Each instructor clearly presented the aim of the session, gave some demonstration and then guided us to do group work which generated more unexpected good thoughts. After the training, one good thing about the course was that the instructors were very generous to share their teaching files with us. Thanks to this, I can review all of the sessions we've been through and apply them to my teaching.*
